

Exercise: ML Lifecycle Case Study

App8 Helps Restaurants Predict Demand Using AWS Solutions

App8 Case Study

Read through the case study, choose 3 of the 11 sections of the ML Lifecycle and write a brief paragraph explaining how you would go about executing on these parts of the lifecycle.

ML Lifecycle 1st Choice

Your reflection

Business Objective: Accurately forecast number of customers for restaurateurs in pandemic time. This will help restaurateurs optimize for inventory of menu items and optimize staff scheduling.

Things to think about

Amazing work at completing one part of the ML Lifecycle, what next?
