

Quiz: Hyperparameter Tuning

QUESTION 1 OF 2

For **Ridge regression**, which options in configuring the model would be hyperparameters?

Select all that apply.

☐

random_state

max_iter

solver

alpha

☐

normalize

SUBMIT

QUESTION 2 OF 2

At which point when building your ML model do you start focusing on tuning hyperparameters?

☐

You should start tuning on your very first model training.

After you build and evaluate your model using the default settings, you can use the first model as a baseline and start tuning hyperparameters.

☐

Never, tuning hyperparameters are a waste of time.
