QUESTION 2 OF 2

In which scenarios below does using Sagemaker make sense?

Select all that apply.

Large data files are stored in S3, and your personal computer does not have the resources to analyze, train, and deploy a machine learning model.

☐ Locally hosted data that can not connect to the internet.

Build and host a model to forecast quarterly sales for a company using data stored from a database.

Creating shared workspaces where colleagues can share ideas and build tools in the cloud.
