Quiz: Sagemaker Jumpstart

QUESTION 1 OF 2

Sagemaker Jumpstart is a collection of tools and processes that allow you to quickly create a machine learning pipeline in just a few clicks. If we relate this to the overall ML Lifecycle discussed in the Machine Learning Concepts lesson, what part of the ML Lifecycle would Sagemaker Jumpstart solve for?

Product, Data, Engineering, and Results

○ Product and Data

○ Data, Engineering, and Results

○ Data and Results

SUBMIT

QUESTION 2 OF 2

If I wanted to customize one of the Sagemaker Jumpstart solutions with my own data, what process would that utilize?

○ Training from a newly initialized model.

Fine-tuning an existing model with your own data to handle your specific use case.

○ Changing the Sagemaker Jumpstart deployment scripts to serve my own models.
